Enterprises have discovered that enabling people to work from home not only results in happier employees and greater productivity, but also enables much more flexibility when faced with unexpected business disruption. Disruption may be caused by natural disasters, cyberattacks, operational blunders, or widespread human threats like wars

Intelligere has partnered with IGEL, provider of the next-gen edge OS for cloud workspaces, to provide of a new "Work from Home Kit" which has been designed to ease and accelerate companies' work-from-home (WFH) strategies.

Intelligere offers solutions to meet business needs offering **SIMPLE, SMART** and **SECURE** solutions that are disrupting how IT delivers end-user computing.

The "Work from Home Kit" includes everything required to deploy IGEL OS to at-home and remote employees, including the UD Pocket which enables even unmanaged, older devices to dual boot into the secure, managed IGEL OS. The WFH kit also includes the IGEL Cloud Gateway function which enables full management and control of endpoints located anywhere via the internet, with secure configuration, updates, and even device shadowing for troubleshooting.

Intelligere working with IGEL enables enterprises to save vast amounts of money by extending the useful life of their existing endpoint devices while precisely controlling all devices running IGEL OS from a single dashboard interface, from any network.

Why work harder than you need to? Get in touch today to discover how we can support you to deliver a truly exceptional end user experience.
