 www.intelligere.ltd

Through our partnership with Login VSI, we offer a suite of solutions to help you provide the best possible user-experience and application performance, and move your business from Service Level Agreements (SLA) to End User Experience Agreements (XLA).

Working in partnership with Login VSI, Intelligere can provide services that include:

- **User Experience Level (XLA) Metrics**
 - Uses a single synthetic user running 24/7, to monitor and to safeguard the optimal performance and availability of your virtual desktop infrastructure and associated business applications
- **Virtual Desktop Infrastructure Optimisation**
 - Benchmark current and continuous performance levels against industry standard, and remediation to gain maximum utilisation from your investment
- **Office 365 Optimisation**
 - Ensure an optimised User Experience on Virtual Desktops for Microsoft Office 365 solutions, plus management of change and frequent update requirements
- **Change Management and patch release impact assessment**
 - Full lifecycle services managing planned changes including regular new builds (Gold Image) or standard weekly updates, as well as monitoring gradual deterioration of desktop and application performance.
- **Cloud Application SLA verification**
 - Monitor Service Level Availability of your SaaS applications, including full reporting and performance analysis
- **Disaster Recovery Testing**
 - Full scale stress testing of the DR environment, including automated application testing to simplify audit compliance
- **Application Performance and Availability Monitoring**
 - Safeguard the performance and availability of your critical business applications, as viewed from the end user
- **Cloud Migration User Experience Validation**
 - Ensure User Experience is integral to Cloud Migration solutions, validating performance pre and post change
